

Configuring a system booth in a matter of minutes

Low-cost, but still compelling? Standard solution, which is nevertheless configurable to individual requirements? MEPLAN's system booths offer a great deal of scope. Whether you are looking for simple, functional basic versions requiring 10 m² of floor space or impressive glass constructions on two levels covering over 100 m². Our system booths can be planned so flexibly that out-of-the-ordinary requests can generally also be implemented in the modular construction. And the best thing is: most system solutions can be priced and booked quickly and simply online: konfigurator.meplan.de

BOOKING SIMPLY AND QUICKLY IN JUST FOUR STEPS

1 Select trade fair
Enter individual booth data

2 Select booth type
Over 100 booth types available

3 Individualise booth
Select equipment

4 Sketch booth
Interactively position position articles
